

Colouring your products can help identify the different grades within your product range

Pigment Range

Era Polymers offer a wide range of Pigments that can be used in our Polyurethane Elastomer products. All materials are supplied uncoloured which allows you, as the processor, to add your choice of pigment.

Pigments are dispersed in Diisononyl phthalate (DINP) to ensure complete chemical compatibility. A variety of colours are available as concentrated liquid pastes, which include the following:

* The colours replicated are as close to actual product colours as modern printing will allow.

For more information on our range of Pigments, please refer to our Pigment Brochure or contact an **Era Polymers** representative on **+61 (0) 2 9666 3788**.
