

## A beautiful Blackbutt timber floor once again!

### Taking care of your timber

Previously this Blackbutt timber floor had been coated with a solvent based finish and the result over time was a very yellow floor that was in need of some restoration.

Nathan Shakeshaft and his excellent team from **Higher Ground Floors** were contracted for this job. The Bowral home owner wanted a natural satin finish to their Blackbutt timber floor and they weren't disappointed with the result.

Nathan and his team chose **Urethane Coatings Waterkote®** range to do the job.

**WaterKote® Sealer** was used to ensure the natural colour of the timber was kept, the timber was finished with **WaterKote® 2K Satin** resulting in a natural Satin finish.

**Urethane Coatings WaterKote®** range of products are non-hazardous water based polyurethane coatings.

**WaterKote®** - an effective and durable non-hazardous alternative whilst retaining the hard wearing benefits of a solvent based system.

### A Beautiful Natural Satin Finish

<b>WaterKote® SEALER</b>	1 component primer/first (sealing) coat
	Extended open time
	Excellent flow and levelling
	Reduces the risk of edge bonding and tannin bleed
	Retains the natural colour of timber
	Reduced sheen finish prevents 'misses' in the next coat
	Subsequent coats remain on the surface maximising the wear layer
<b>WaterKote® 2K SATIN</b>	A NEW generation 2 component water borne polyurethane
	Extended open time
	Exceptional flow and levelling.
	Can be walked on after 24 hours
	Full Cure 5 - 7 days after application
