

Era Polymers – Greenlink HR255 Providing Comfort

Excellence in Polyurethane Chemistry

Theatre Goers enjoy the comfort of Era Polymers – Greenlink HR255

Merje from Wellington, design, develop and manufacture a range of seating; they provide a complete service from initial design, prototyping, testing and development through to final production, and installation.

Recently Merje used **Era Polymers – Greenlink HR255** for the comfort of Theatre goers in Auckland.

670 seats were installed in Auckland Waterfront Theatre. All seats were mounted to the floor on pedestal bases incorporating a perforated stem for air conditioning and LED lighting within the base.

You will notice from the picture the interesting colour layout, this is designed so that empty seats are not notably visible to the actors.

Craig Bishop from **Era Polymers New Zealand** has tested the seats and says “They are very comfortable!”

So if you need foam for cushions try **Era Polymers Greenlink HR255**.

Era Polymers Greenlink HR255 a high resilient water blown flexible polyurethane foam. This material contains no halogenated raw materials and the ratios of **Greenlink HR255** can be changed to produce harder or softer foam depending on your requirements.

For further information on **Greenlink HR255** or any of **Era Polymers other Foams** please contact:
