

New Handi Stick®

ARCHITECTURAL FOAM SHAPES ADHESIVE WITH A FASTER GRAB TIME

Era Polymers (agents for Fomo Inc. USA in Australia) are pleased to announce the release of **Handi-Stick® Architectural Foam Shapes** adhesive.

This adhesive which is part of the **Handi-Stick®** range is compatible with all polystyrene applications including architectural foam shapes, mouldings, foam boards and insulated concrete foams.

Handi-Stick® Architectural Foam Shapes adhesive, a one component foam is conveniently packaged in a pre-pressurised can. It is easily applied in bead form and dries tack free in under three minutes, adhering to polystyrene, concrete, cinder block, brick, exterior gypsum board, plywood and most other substrates.

Handi-Stick® Architectural Foam Shapes not only has fast cure times providing quick and powerful bonds but also expands to fill uneven surfaces and voids. It meets **ASTM E84 Class 1** for adhesives, contains no volatile organic compounds or solvents that can harm polystyrene board.

So next time you need something to fix architectural foam shapes think **Handi-Stick® Architectural Foam Shapes** adhesive, for a fast and professional finish.
