

2 & 3 Component Dosing, Mixing & Casting Machines

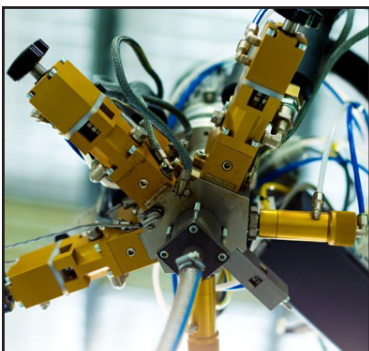

Excellence in Polyurethane Chemistry

Era Polymers are the distributors for **Polytec EMC** in Australia, New Zealand and Indonesia. Manufacturing high-quality, multiple-component mixing and dispensing systems since the 1980's **Polytec EMC** have a wealth of experience.

The units in **Polytec EMC's DG 130** series are ideal for small to medium-sized production and suitable for all 2- or 3-component, reactive systems such as TDI, MDI or Eralan.

Fully heated component lines can attain temperatures of up to 130°C and the supplementary module for a third component can be quickly and easily attached to the basic unit.

Colour and additive dosing, as well as a vacuum device make the **DG 130** an especially flexible solution for turn-key projects and much more. **Polytec EMC** machines can be customised in order to meet the customers requirements.

TECHNICAL DATA	
Output	Up to 6kg/min
Tank Size	34 - 100 litre
Temperature	Up to 130°C
Compressed Air	6 Bar

OPTIONAL FEATURES
• Colour & Additive Dosing
• Vacuum Device
• Service Modem
• Volumetric Gear Flow Metre
• Automatic Refilling
